

Preliminary insight 01

Reported AI use by business size

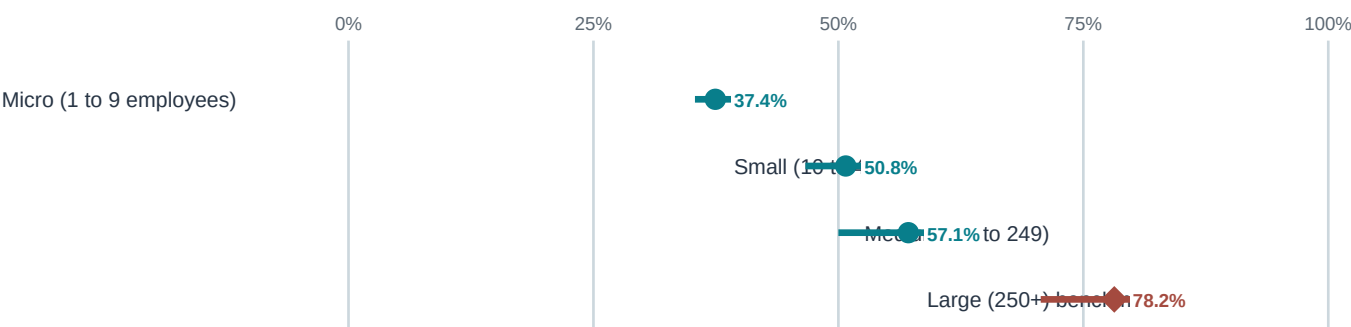

INTERNAL - NOT FOR PUBLICATION

Report 01 | UKBDS 2026 | D-013

Key message

Reported use of at least one listed AI-based technology was 37.4% for micro businesses, 50.8% for small businesses and 57.1% for medium businesses. The large-business reference benchmark was 78.2%.

Estimates and supplied 95% confidence intervals

Evidence table

Published size group	Estimate	95% interval	Base
Micro (1 to 9 employees)	37.4%	35.4% to 39.5%	2,500
Small (10 to 49)	50.8%	46.6% to 54.9%	680
Medium (50 to 249)	57.1%	50.0% to 64.3%	220
Large (250+) benchmark	78.2%	70.7% to 85.7%	130

What this preliminary result shows

The point estimates rise across the published business-size groups. This provides a baseline for choosing the next question.

What it does not show

It does not prove statistically significant differences, explain why use differs, or show that business size causes AI use.

Source and interpretation boundary

DSIT, UK Business Data Survey 2026, Table 42. Denominator: all UK businesses within each published size group. Bases are rounded unweighted respondent counts, not counts of UK businesses.
